

Matching Assistance Program for Professionals Family & Child Matching Made Easy

What is Matching Assistance?

Matching Assistance is a password protected membership program with additional child listings, helping support home study-approved families who are seeking to adopt from foster care. MAP works alongside families, their adoption workers, and children's social workers during the "matching" phase of the adoption process, connecting waiting families with children.

MAP is a useful recruitment resource that works **with** you, adoption workers, and social workers to connect families and children.
